Dear Dr. Martinez:

The 1989 Spring Meeting of the Materials Research Society is now only three months away. You should receive the booklet describing the meeting and containing registration information within the next two weeks from the MRS headquarters.

I want to take this opportunity to confirm that you are on the program of the symposium titled: **"Materials for the Infrastructure: A Multi-Billion Dollar Opportunity"** which will take place on Wednesday, April 26 and Thursday, April 27. I appreciate your interest in this meeting and look forward to meeting you in San Diego. As you will see from the attached draft program, it promises to be a very interesting symposium. The MRS is making strong efforts to attract to the symposium materials scientists who are unfamiliar with infrastructure problems, in the hope of getting them more involved.

Being an invited paper you have been allocated 30 minutes on the program. Please leave at least five minutes for questions, i.e., plan to speak for no more than 25 minutes. There will be a general discussion at the end of each of the two sessions.

I hope that it will be possible for us to pay your registration fee. When you submit your registration form to the MRS please add a note stating that the symposium chairman has told you that your registration fee would be paid for you.

If you have any questions please call me at (312) 972-4929 or Damian Kulash at (202) 334-3774.

Sincerely,

Brian R. T. Frost
Symposium Co-Chairman
